Notification of Planned Sanitary Sewer Inspection Work

Closed circuit television inspection of parts of the Town of Beaufort's sanitary sewer system is scheduled to begin on Monday, September 16th. The work is to be performed by a contractor engaged by the Town and expected to last five days, through Friday September 20th.

Closed circuit television inspections of the sanitary sewer system are used to assess pipe condition and identify problems or possible future failures which need attention. The CCTV process also identifies the piping condition to allow for replacement prior to failure. The work first involves cleaning of the line to be inspected. Water is pumped through a hose to a special nozzle with enough pressure to whisk away debris. The debris and water are collected during the process for proper disposal. The cleaned line is then viewed using a specialized camera which makes a video recording.

The sewers to be inspected are located beneath the following Town streets:

- Cedar Street between Moore Street and Marsh Street
- Turner Street between Pine Street and Cedar Street
- Craven Street between Pine Street and Mulberry Street
- Marsh Street between Broad Street and Mulberry Street
- Campen Road between Lockhart and Wellons Drive
- Mashburn Drive

Please be aware that the contractor's vehicles may be parked in the streets when performing the work. The contractor is to provide traffic control devices such as cones and barriers together with signage to allow for the safe movement of road users through the work zone.

Mayor Everette S. (Rett) Newton
